

Exhibit 2

Infringement Claim Chart for U.S. Pat. No. US8140440B1 Vs Zoho Corporation

Claim 20	Evidence
<p>20) An electronic mortgage closing document processing system comprising a server computer configured to:</p>	<p>The defendant product (i.e., Zoho Sign) is a Web-based electronic signature document processing platform that can be accessed via websites and mobileapps.</p> <div data-bbox="594 527 1822 820" style="border: 1px solid green; padding: 10px; margin: 10px 0;"> <p>You can easily esign a document using Zoho Sign. Just open the app in your browser or mobile device, upload your documents, add signature fields to the document through drag-and-drop, and position them where necessary to finish signing it. The signed document is then stored securely in the cloud and you can download it or send it to others on demand.</p> </div> <p>Source: https://www.zoho.com/sign/what-is-esign.html</p> <div data-bbox="793 896 1623 1242" style="border: 1px solid green; padding: 10px; margin: 10px 0;"> <p>Electronic signatures are a digital alternative to signing paper documents with hand-drawn signatures. You can use electronic signatures to digitize your documents and go completely paperless. By using an app like Zoho Sign, you can easily create an electronic signature and then upload your files to sign them. The process is straightforward and much more secure than traditional paperwork.</p> </div> <p>Source: https://www.zoho.com/sign/how-to-create-electronic-signature.html</p>

	<div data-bbox="537 238 1885 500" data-label="Text"> <p>The Zoho Sign app supports all popular document formats. <u>Once you upload your files onto the app, they are converted to a common PDF format for electronic document signing. To add an electronic signature to PDF documents, follow these steps:</u></p> </div> <div data-bbox="457 488 1677 524" data-label="Text"> <p>Source: https://www.zoho.com/sign/how-to-create-electronic-signature.html</p> </div> <div data-bbox="516 654 1260 984" data-label="Text"> <p>An eSign app like Zoho Sign can help you move to paperless operations and reduce your business's carbon footprint. It also helps you cut down on printing and scanning costs. And, when you sign documents online, you also reduce the overall turnaround time taken to close deals and business agreements. <u>All of your signed documents can be accessed and easily managed at all times in secure cloud storage.</u></p> </div> <div data-bbox="457 997 1337 1034" data-label="Text"> <p>Source: https://www.zoho.com/sign/what-is-esign.html</p> </div> <div data-bbox="457 1034 1659 1071" data-label="Text"> <p>Source: https://www.zoho.com/sign/features-and-benefits/?src=homepage</p> </div> <div data-bbox="1251 552 1900 1011" data-label="Complex-Block">  <h3>Mobile signing</h3> <p>Download our native apps for Android or iOS to sign documents on the go or to send documents out to collect signatures. You can also access Zoho Sign from your mobile browser.</p> </div>
<p>a)receive electronic mortgage closing documents;</p>	<p>Zoho Sign Electronic Signature allows for the secure upload and storage of electronic documents, including mortgage closing documents. These documents can be uploaded by authorized users or integrated into existing systems.</p>

Popular use cases

- Rent agreements
- Sales contracts
- Closing disclosures
- Offers to purchase
- Floor plans
- Liens
- Leases
- Affidavits
- Mortgage forms
- Brokerage agreements

How authentication works

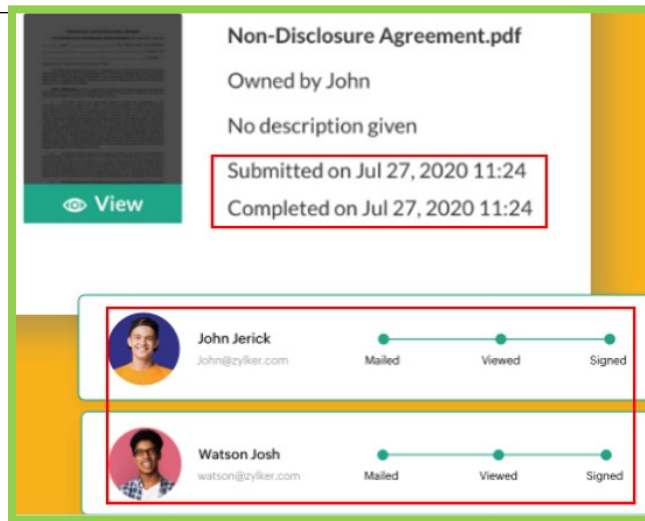

- ✓ Whenever a user would like to access Zoho Sign from the web, an extension, or mobile apps, they will always be automatically redirected to the Zoho Accounts login page
- ✓ The login credentials will be submitted to the Zoho Accounts server for authentication
- ✓ Upon successful authentication, cookie information will be set for the user's session and user access will be redirected to:

Source: <https://www.zoho.com/sign/security.html>

Email authentication

For everyday documents, you can have recipients authenticate themselves via email. They will automatically receive a system-generated authentication code when they attempt to sign or view the documents.

Source: <https://www.zoho.com/sign/features-and-benefits/signer-authentication.html>

Source: <https://www.zoho.com/sign/#:~:te>

Configure workflows

Define the signing order when sending a document to multiple recipients, and control how they receive and sign your documents.

Track status

Track every step of the document signing process. Receive instant alerts and notifications on the status of each document.

Source: <https://www.zoho.com/sign/#:~:te>

c) identify one or more entities participating in

Zoho Sign Electronic Signature facilitates the identification of participants in an electronic document signing session through user authentication methods, such as email verification and secure logins. Zoho Sign monitors user activity and can confirm when participants have

an electronic document signing session; determine that the one or more entities have connected to a document signing session;

joined a document signing session, providing real-time status updates.

How authentication works

- ✓ Whenever a user would like to access Zoho Sign from the web, an extension, or mobile apps, they will always be automatically redirected to the Zoho Accounts login page
- ✓ The login credentials will be submitted to the Zoho Accounts server for authentication
- ✓ Upon successful authentication, cookie information will be set for the user's session and user access will be redirected to:

The screenshot shows the 'Sign documents' interface in Zoho Sign. It includes tabs for 'Type', 'Draw', and 'Upload'. Under the 'Type' tab, there are input fields for 'Signature' (containing 'John Martin') and 'Initial' (containing 'Your initial'). Below these are three rows of examples showing handwritten signatures and initials. To the right, a blue vertical bar is visible. Further right, the text 'Sign documents' is displayed, followed by a description: 'Digitally sign documents yourself or get documents signed in-person, or send documents to collect signatures from anyone.'
